Marking Rubric –BTP200 Project, Summer 2017
(Weight: 20% of term mark)

On time submission of milestones 1, 2, 3,4, and 5:   20% (4% each)

On time submission of milestone 6 (fully assembled project):   20%

_____

1. ***Total possible for on time submission:***   **40%**

2. Properly working code: **30%**

    If the submitted program is deemed not to be properly working, or has
    hard-codded sections inserted by you in order to pass the submission
    tests, your professor may require a revision and re-submission of your
    project. Your project will not receive any marks other than marks earned
    for on-time submission until you have submitted a properly working
    project.

3. Well-formatted code, with proper indentation to show logical structure,   **10%**
    and consistent spacing

4. Proper use of C++ constructs and statements: **10%**

5. OO Modular design, implementing single entry – single exit, high cohesion,   **5%**
    and low coupling, utilizing encapsulation, inheritance, and polymorphism
    where appropriate

6. Comments where appropriate: **5%**
_____

Total: **100%**
